

# Meeting 30

## Week 7

Scribe – James Oatley

Apologies: Steve

Zayyad not present.

## Old Business – Action Points from Last Meeting

Work carried forward, on JIRA.

## New Business

Few problems with eCook, JIRA tickets still not all being picked up with little coding last week from some people. This needs to change.

Testing not good enough:

- Unit tests need to be written for every class

- Do the visual elements work as they are supposed to?

- You can “fire” events in JUnit testing

## Action Points

Group split between testing and product line:

- John and Steve to work on handlers and then testing handlers
- Ankita and James

Video to be considered (Ankita and John).

Roger should head up a team of testing with Max, Prakruti, Paul and Sam.

Testing:

- eCook – Roger

- errorHandler – Sam

- fileBrowser – Roger

GUI – Roger

Notes – Max

httpAccess – Max

shoppingList – Max

timer – Steve

parser – Max

recipeScaler – Paul

validator – Prakruti
