

Meeting 3

Week 5

Things to Do!

Look at tender presentations – will discuss on Monday

Financial Business Plan

PWS

All groups should agree on this by next Wednesday

Organise a meeting for this,

SWAG

What will we do for our basic functionality?

- (1) Read an XML playlist
- (5) Access recipes via http
- (3) Use a file browser to open a file
- (2) Play a video
- (1) Display image on a slide
- (1) Display graphics object
- (1) Display text object on slide
- (2) Display slide
- (3) Play audio
- (2) Read a recipe XML playlist
- (4) Move between slides
- (4) Control audio/video playback by menu
- (4) Exit the slideshow to main menu

We won't be doing two of these things ourselves.

Require timings in hours, estimates are done in “pair hours” i.e. how many hours will it take two of us to do the task? Including testing!

Rough timings for basic functionality:

(1) Read an XML playlist	-	4 pair hours
(5) Access recipes via http	-	can't estimate atm
(3) Use a file browser to open a file	-	8 pair hours
(2) Play a video	-	6 pair hours
(1) Display image on a slide	-	2 pair hours
(1) Display graphics object	-	2 pair hours
(1) Display text object on slide	-	2 pair hours
(2) Display slide	-	4 pair hours
(3) Play audio	-	6 pair hours
(2) Read a recipe XML playlist	-	10 pair hours
(4) Move between slides	-	5 pair hours
(4) Play/pause slide content	-	6 pair hours
(4) Exit the slideshow to main menu	-	8 pair hours

We also have 4 hours integration time for each feature.

JIRA

Sprint = iteration on JIRA
