

Departmental Weekly Report

Week Beginning: 24/02/14

Work Summary

- Conducted software team meeting with Development and Test and Integration Managers
- Met with coding groups to review coding progress, specifically code for the Image module and the XML parser, discussed problems with JUnit and agreed with Testing manager a temporary test standard.
- Asked the Development manager to make a sample XML file incorporating all PWS to guide XML parser coding and for using in integration testing.

Issues

- The Kanban board on JIRA went down briefly on Sunday for unknown reason but Development manager managed to successfully restore access by the end of the day.
- JUnit still appears incompatible with JFX, Testing manager has been asked to meet with a member of another group who says they have conducted full JUnit testing using JFX
- Have last week's issues been successfully resolved?
- Making progress towards completing the sprint (2 user stories have been completed) and to deliver the required Image module to the other group by the end of week 9.

Week Beginning: 03/03/14

Work Plan

- Outline of work to be completed by the department next week
- Image module which conforms to PWS to be delivered to contracting group by Friday week 9. Internal deadline to deliver this before Friday to demonstrate to contracting group.
- Brief details of any inter-department work (if any)
- Sprint 2 to be completed by Friday reading for integration at the weekend, which is to be conducted by myself Testing and Development manager.

Issues

- Any potential issues that may result from the work planned
- Difficulty handling the optional attributes of the PWS for the Image Module

Notes:

Include any further information if necessary.
