

eCook Video Tutorial Script

Steve Thorpe

Introduce main menu, talk through the four buttons, Recipe Menu, Ingredients Menu, Shopping List Menu and Import Recipe Menu. Click on all of them and give a brief description of the contents.

Recipe Menu "For selecting a recipe and viewing it using the slide show viewer"

Ingredients Menu "For viewing information and the ingredients for all of the recipes, and selecting ingredients to add to the shopping list."

Shopping List Menu "For viewing and editing your shopping list"

Import Recipe Menu "For import new recipes either locally or via the internet"

To add a new recipe go to the Import Recipe Menu, demonstrate first the use of HTTP. Select the recipe from the list you wish to download and then click download selected.

Demonstrate the file browser, open the file browser navigate to a recipe and open it.

Go back to the home page and click on the recipe menu. Indicate to the viewer where the new recipes have appeared.

Showing the download content button. Explain that this button means that the user has the option to either stream content, by just pressing play, or that they can download all of the recipe content to their hard drive. Press the download content button on one of the recipes and then show that they can continue using eCook while this is happening.

Play the tomato and chorizo recipe. Show the control bar down at the bottom.

Single right arrow "Goes to the next slide" Go forward a slide

Single left arrow "Goes to the previous slide" Go back a slide

Double right arrow "Goes to the last slide" Go to the last slide

Double left arrow "Goes to the first slide" Go to the first slide

Pause Button "Used to pause all content on the recipe. Recipe slides on eCook can have a duration after which they will move to the next slide. To stop this, use the pause button"

Timer Button "Click this to add a timer, up to four timers can be added" Add a timer, show how it can be set started paused and reset. Rename one of the timers as well.

Demonstrate the pinned notes feature, type something into the bar. Go forward a slide, show the pinned note is not the same, go back to the previous slide and show the note remains.

Exit button "Exits back to the main menu" Use the exit button to go back to the main menu.

Open up the stocks recipe. Demonstrate how branching can be used on the text (use the knife skills video)

"Click on indicated text to go to the branch slide to view content On a branch slide, press either the previous or next button to return to your previous position in the recipe".

Then go to the last page and show that branches can also be included on images (show that they glow when they are branches). "Images that can be used to branch will glow"

Ingredients Menu, show the recipes in the recipe bar, click on a few of them and demonstrate the list of ingredients. Talk about the type of information available "Shows you the chef, the number of people it serves and some comments from the chef about the recipe"

Demonstrate the multiple guests feature, enter another number and show that it scales the recipe.

"Enter a number into the bar and press the button to recalculate the ingredients required"

Select some ingredients then add them to the shopping, use the select all feature.

"Check the ingredient boxes and click add items to add them to the shopping list"

Go to the shopping list menu, show that all of the items have been selected. Remove some items from the shopping list,

"Press the edit button, check the items you wish to remove and then press the save button"

"To add your own items to the shopping list, use the add button, type what you would like and then press the save button"

"To export the shopping list as a pdf, press the save as PDF button, to print the shopping list directly, connect your printer to your computer and then press print"
